

The West Toronto Diamond Grade Separation Project is an important rail infrastructure project that will eliminate a major bottleneck at the most heavily used rail crossing in Canada. When completed, GO trains on the Kitchener line will pass below CP freight lines, and this will improve service reliability, reduce noise, improve safety, and allow for future service improvements to reduce congestion in the northwest of Toronto.

West Toronto Diamond – Sunday Work Temporary change in working hours

What we are doing

- Interlocking sheet-piles will be installed to allow us to work in smaller sections, removing water and excavating.
- Much of this work is being done during the week; however, some of it must be done over the weekend when trains are not operating.
- Weekend hours for this work are confirmed for **Saturday February 25 and Sunday February 26.**
- If the work can not be finished in one weekend, Sunday hours may be required in March or April.

How this will affect you

- Nearby residents will notice an increase in noise levels during this work. The vibratory method used for installation causes a distinct steel-on-steel rattle.
- Please note that we continue to monitor noise and vibration as we complete this work.
- Workers will be onsite from 7 a.m. – 10 p.m.

**For updates about Sunday work, please visit our website www.gotransit.com/gts.
Thank you for your continued patience.**
