

The West Toronto Diamond Grade Separation Project is an important rail infrastructure project that will eliminate a major bottleneck at the most heavily used rail crossing in Canada. When completed, GO trains on the Kitchener line will pass below CP freight lines, and this will improve service reliability, reduce noise, and allow for future service improvements to reduce congestion in the northwest of Toronto.

West Toronto Diamond Construction Update

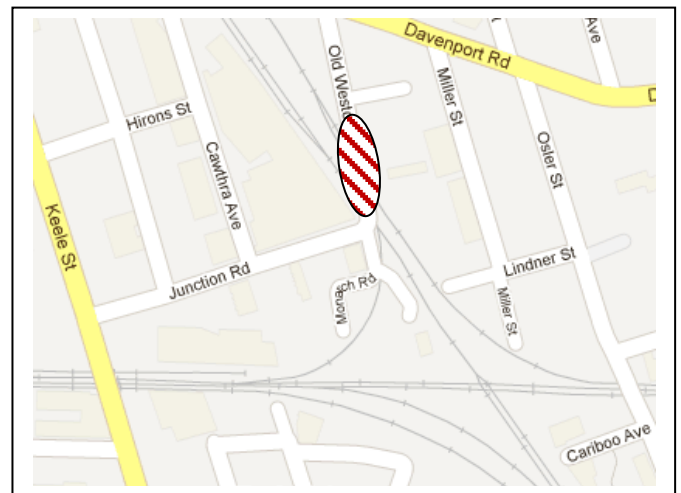

Closure of Old Weston/Junction Road Rail Crossing January 26 – Summer 2013

What we are doing

- To prepare for the bridge installations, we need to access the underground work tunnels which are below Old Weston/Junction Road.
- Underground work includes building the bridge foundation to prepare for the bridge slide installation.

How will this affect you

- This work requires a full road closure. Pedestrian access will also be closed during this time.

Public Meeting

Please join us to learn more about the progress we have made and what will take place in 2013.

Date: Thursday, February 21

Time: 6:30 to 8:30 p.m.

Location: St. Josaphat Ukrainian Catholic Cathedral, 110 Franklin Avenue
